Work Experience

Jul 2023 - Present

Senior Full Stack Developer and Senior Manager

Invoked Digital Pvt Ltd

Joined as a Senior Full-Stack Web Developer and was later promoted to Senior Manager. I balance my time between coding, DevOps activities, project management, and team management.

Nov 2021 - May 2023

Senior Full Stack Web Developer - Team Lead

Axion Technical Services Pvt Ltd

Developed and maintained websites and web applications, including a real-time video calling application. Also led and managed a small team of developers.

Feb 2021 - Nov 2021

Senior Full Stack Web Developer

Isys Technologies

This was a contract-based project where I developed two web portals using CodeIgniter for L&T Chennai while working at Isys technologies.

Jun 2019 - Feb 2021

Web Developer

Infosearch BPO Services

Worked on multiple web portals and applications, including an employee attendance portal, data collection CRM, lead tracking CRM, and other business applications, using CodeIgniter and Laravel.

Feb 2019 - Jun 2019

Web Developer

Yesbumpper Technology

Worked as a PHP Web Developer, developing websites and admin panels using CodeIgniter.

Jan 2018 - Jan 2019

Perl Developer

Marlen India pvt ltd

Developed and structured web crawling software, created reports using Microsoft Excel, and managed a small team.

Projects

24 Months

SOH / Renu APP

Renu App is a digital health care platform designed to simplify how patients interact with medical services and manage their health records.

Developed the APIs using Laravel and containerized the application using **Docker** and deployed using **CI/CD** on **AWS ECS** Fargate.

2 Months

DeliveRx

DeliveRx is a futuristic web application to help the user to sale their clinical products such as vaccines and medicines. It was built using Laravel and fully responsive.

It has custom **AI assistant** (chatDRX) to find the target audience and suitable location. It has cutom **AI chatbot** as well.

18 Months

Nex-care

Nex-care is a **multi-tenant CRM** where clients can have their own company-level accounts to manage their childcare homes. It is a large-scale CRM and it was built using **Laravel** and hosted on **DigitalOcean (cloud)** with a fully automated **CI/CD** pipeline.

2 Months

Abbey Construction Consultations

It is a CRM tool that provides project management capabilities with support for **multiple client logins**. Each client can have different user roles and multiple users.

The tool is similar to **Google Drive**, where users can create folders and upload files into them.

12 Months

Veyes

Veyes is a CRM designed to manage insurance leads for multiple companies. I implemented several advanced features, including **real-time video calls** for recording inspections, image compression without significant loss of quality, and file storage using **Amazon S3**.

2 Months

AnvikaClinic

AnvikaClinic is an **appointment booking system** built using Laravel. Patients can booking appointments easily with user friendly UI design. It also includes separate CRMs for Doctor and Patient logins.
